

Hand Wrought Lighting Fixtures

D. ROJAN CO.
Art in Metal
25 East 20th Street
New York

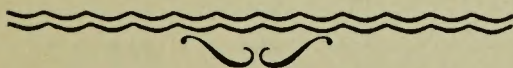

THE lanterns, lamps, and sconces illustrated in this booklet, are representative of the high quality of metal work offered by D. Kojan Co.

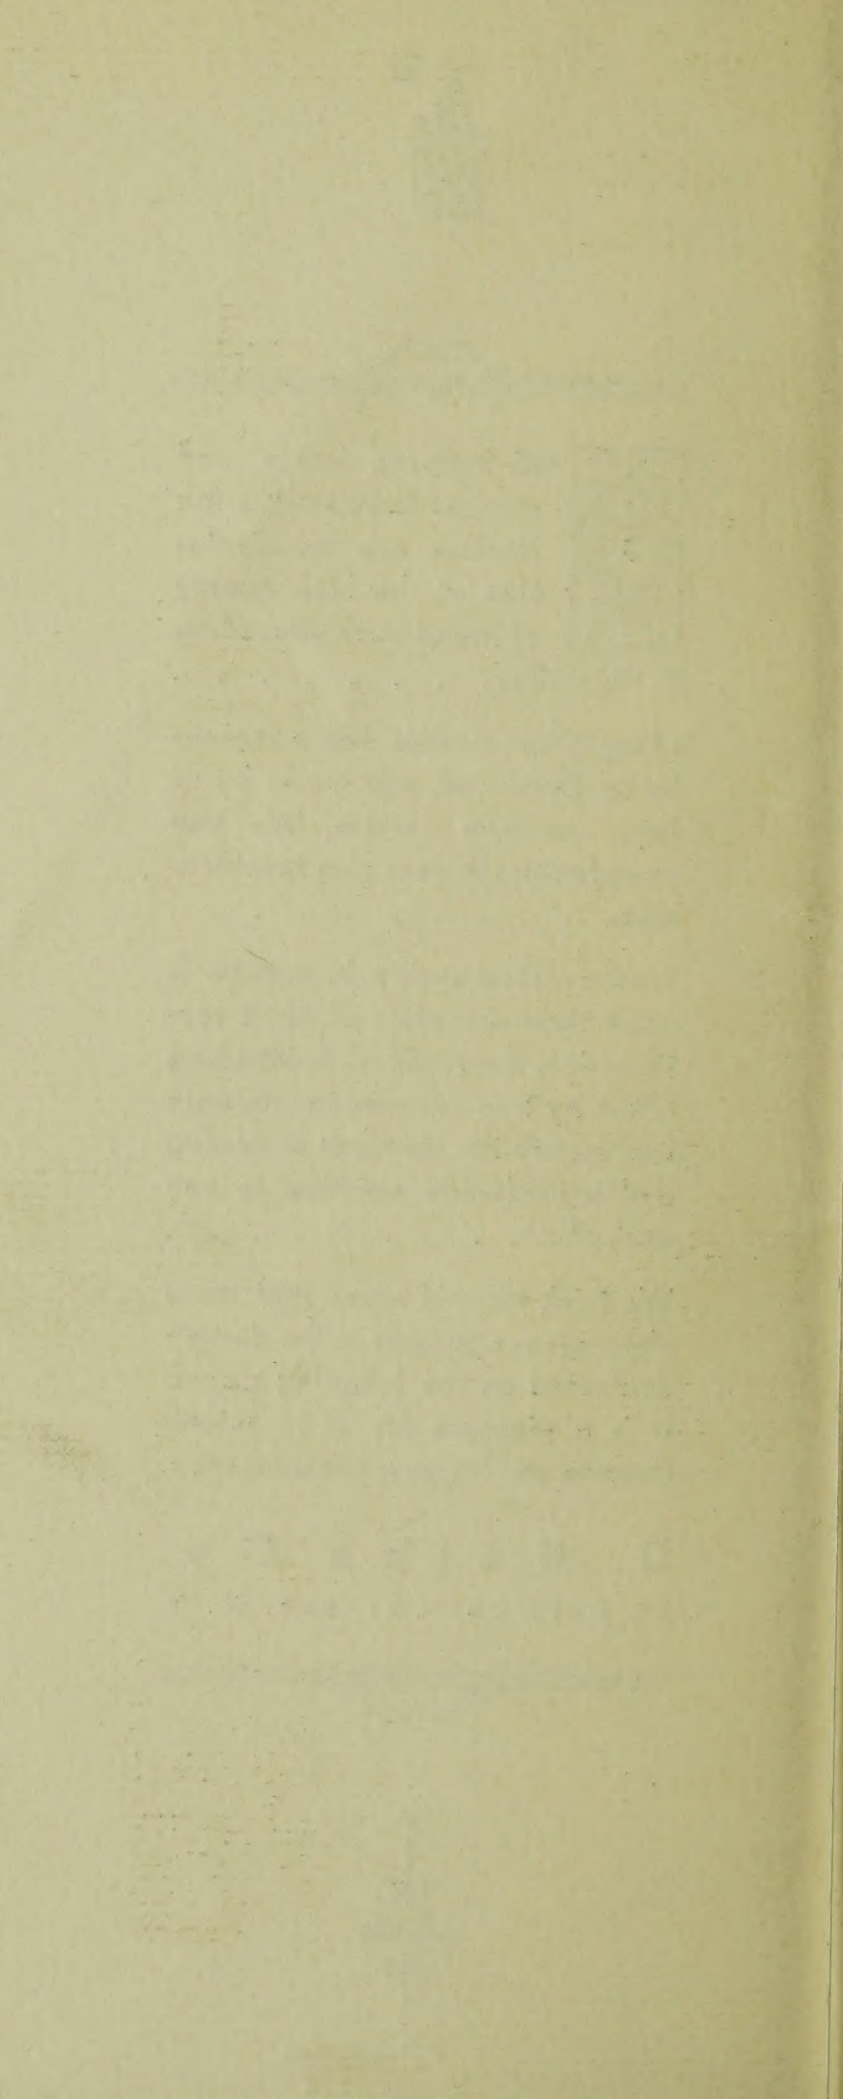

Many other models, too numerous to be illustrated, are made by us from our own designs. We also manufacture to your own specifications.

True craftsmanship in metals is more than a matter of mere routine—it is the result of painstaking effort by true artisans to translate into metals the elements of feeling and individuality essential to any work of art.

We think you will agree that those elements are present in the designs illustrated on the following pages. It is a pleasure for us to submit them to you for your consideration.

AUTHENTICITY of design and beauty of execution are standards insisted upon by buyers of the finer class of hand wrought fixtures everywhere. . .

If we have had the opportunity of supplying your requirements heretofore, you already know how faithfully we adhere to those standards.

However, if we have not supplied you heretofore we trust that the designs illustrated in this booklet will impress you sufficiently for you to order the fixtures that interest you most.
